

Pelleve Skin Tightening & Wrinkle Reduction

Dr. Marco Lopez Dr. Roberta Krueger

Before

- To help prepare for your Pelleve' treatment and to compliment your results, increase hydration levels and nourish the skin by using our Image Skincare Hyaluronic Filler.
- Please stop any topical Prescription strength topicals such as Hydroquinone and Retin-a/Retinol at least 3-5 days prior to your Pelleve' treatment.
- Please inform us of any active wound, cut, or infection to the treatment area prior to your Pelleve treatment.
- Please limit sun exposure prior to treatment. Notify us of sunburn must be notified to Sculpt Away prior to procedure.
- All jewelry and make-up must be removed from the treatment area prior to Pelleve'.
- Male clients- please remove beard stubble thoroughly prior to your treatment. To avoid irritation, please shave the night before your treatment; avoid shaving the day of your treatment.

After

- Hydrate your body! Drink ½ your body weight in ounces of water daily between your Pelleve treatments. (Ex. Your weight is 150 lbs., drink 75 ounces of water daily).
- Pelleve' does not cause photosensitivity, but to prevent further sun damage and aging, apply an SPF 30 Broad spectrum (UVA/UVB) daily to the face and neck. We recommend your choice from the Image SPF Prevention + line. Please ask your Treatment Specialist at Sculpt Away.
- Possible mild side effects are usually limited to the treatment site. These include mild redness and swelling. A gentle, warming sensation of the skin may be felt after treatment. These typically subside within a few hours , but may last longer. Avoid steam/hot water and cleanse skin with a gentle cleanser (we suggest Image Skincare Ormedic Cleanser) until sensitivity subsides.
- You may return to normal activity after Pelleve'. Make-up may be applied after treatment.
